

Innovator Learning Activities

Innovate to protect the Belize coral reefs and wider world

27. What Can I Do?

Requirements:

Innovator team: individually or in pairs

Curriculum: Science; Citizenship

Time: 20 minutes

As a Researcher, you may have learned about **how climate change threatens the health of the Belize Coral Reef System as well as all our lives. Burning coal, gas and oil (fossil fuels), cutting down forests, and farming livestock all add large amounts of gases into the atmosphere, increasing the ‘greenhouse’ effect which causes global warming.**

Ask yourself, ‘What can I do?’ to reduce the amount of fossil fuels burned, forests cut down, and livestock farmed:

- **What changes can I make at home?**
- **What changes can I make in the way I get to and from school?**
- **What changes can I make at school?**
- **What changes can I make to what I eat and drink?**
