

Innovator Learning Activities

Innovate to protect the Belize coral reefs and wider world

28. How Well Am I Doing?

Requirements:

Innovator team: individually

Curriculum: Science; Citizenship

Time: 20 minutes

Everyone generates carbon emissions. We breathe out carbon dioxide (CO₂), and trees and plants need it to live! However, over the past few decades, humans started making much more CO₂ than the planet can handle.

Look at [How Big is Your Carbon Footprint?](#)

How did you do?

- Less than 20 points – you have a small carbon footprint. Well done!
- 20-100 = you are doing well but there are some areas for improvement
- 100-200 = there is a lot of room for improvement
- More than 200 = you need to look for ways to shrink your carbon footprint now!
