

Innovator Learning Activities

Innovate to protect the Belize coral reefs and wider world

29. Take Action (part 1)

Requirements:

Innovator team: individually

Curriculum: Science; Citizenship

Time: 20 minutes

Look back at your carbon footprint calculator (activity 28) and choose 3 things you should do to shrink your carbon footprint. Then complete the table of pledges:

I pledge to:
This action will shrink my carbon footprint by ____ points.
I pledge to:
This action will shrink my carbon footprint by ____ points.
I pledge to:
This action will shrink my carbon footprint by ____ points.

Decide upon a date to check your carbon footprint again to see how you are doing. If you shrink your carbon footprint then you are helping to slow down climate change, which will reduce threats to the environment, including the Belize Coral Reef System. Well done!
